MANAGEMENT DISCUSSION AND ANALYSIS

COMPANY'S BUSINESS

The Company's business is manufacture of Cotton yarn, woven and coated fabrics, Garments, Processing and wind power generation. The Company has two modern spinning units near Dindigul, Tamilnadu with installed capacity of 1,44,240 spindles, Weaving unit near Palladam, Tamilnadu with installed capacity of 135 Looms, Processing & Technical Textiles near Annur, Tamilnadu with capacity to produce 24 Lakhs meters of coated fabric per annum and 32 windmills with installed capacity 29.95 MW of Power. The whole of the power produced by the wind mills is captively consumed by the spinning units.

INDUSTRY STRUCTURE AND DEVELOPMENTS

India is the world's second largest producer of textiles and garments. The Indian textiles industry accounts for about 24 per cent of the world's spindle capacity. The potential size of the Indian textiles and apparel industry is expected to reach US\$ 223 billion by next 6-7 years.

The sector contributes about 14 per cent to industrial production, 4 per cent to the gross domestic product (GDP), and 27 per cent to the country's foreign exchange inflows. The textiles sector is the second largest provider of employment after agriculture. Thus, the growth and all round development of this industry has a direct bearing on the improvement of the India's economy.

India has improved its ranking to emerge as the second largest exporter in the world from fifth position. This was possible due to reason that the textile industry is vertically integrated from raw material to finished products.

India has emerged as the most preferred destination for global brands due to its strength of vertical and horizontal integration.

Overall demand outlook for the textile industry for the financial year 2014-15 is expected to remain stable; the rebounding economic growth in key export destinations, stabilising input costs and exchange rates being key factors for the industry. The trends, if sustained in FY15 (year end March), are likely to improve the financial metrics of yarn and garment manufacturers.

Textiles exports stood at US\$ 28.53 billion during April 2013-January 2014 as compared to US\$ 24.90 billion during the corresponding period of the previous year, registering a growth of 14.58 per cent. Garment exports from India is expected to touch US\$ 60 billion over the next three years, with the help of government support

OPPORTUNITIES, RISKS AND CONCERNS

The current optimism in the industry has substantially been driven by international developments. There has been an overall economic recovery in the USA and a demand recovery for textiles in the EU. Efforts of Indian exporters for market diversification have also produced some positive results. While China continues to be our largest competitor in most of the importing countries, it has also become an important export market for India not only for cotton and yarn. Compliance issues and political

turbulence in Bangladesh, the favourable exchange rates are also helping India to improve its export performance. Some of the most successful garment exporting countries like Bangladesh and Vietnam are now sourcing yarn and fabrics from India in a big way. Our garment industry has also been reporting impressive growth in current exports and order position for the coming months.

There has also been marked improvement in demand for textile products in the domestic market which is expected to continue.

The Cotton Association of India has estimated the cotton crop output at 388.25 lakh bales (of 170 kg each) for the 2013-14 season ending September. Cotton output was at 357 lakh bales last year. Total cotton supply is estimated at 447.50 lakh bales, while domestic consumption is pegged at 295 lakh bales, leaving a surplus of 152.50 lakh bales. As on May 15, arrivals were about 350 lakh bales.

Garment exporters in Tirupur knitwear cluster expect that the knitwear garment exports would double in three years if certain issues affecting the growth of the sector such as handling of Pollution of Garment Dyeing units and improvement in infrastructure are addressed by the Government without delay.

However, with the US and EU accounting for more than 70% of Indian apparel exports, the concerns over the economic health of these countries continues to put pressure on the Indian apparel exporters in the medium term. The price fluctuation of cotton and its volatility in supply due to monsoon conditions may affect the sector along with exchange rate risk.

A supportive financial package with reduced interest costs may offer more stability to the industry in the present context.

SEGMENT-WISE AND PRODUCT-WISE PERFORMANCE

The entire operations of the Company relate to only one segment viz Textiles therefore, segment/product-wise details are not applicable.

OUTLOOK

With the optimum utilization of very modern machinery and the measures taken by the company overcome Power crisis, it is expected that the Company would be able to improve efficiency. The company has been taking steps to increase the export sales as well as up-country sales for improving the sales turnover and focusing on the increase on the value added products.
