BANNARI AMMAN SPINNING MILLS LTD.

Spinning success
from cotton to textiles

To achieve excellence in all sectors of the textile industry, from fibre to finished product, constantly striving to be at the forefront of our industry and to generate highest possible value for all stakeholders.

- To manufacture international quality yarn, fabric and ultimately the finished textile garments with the highest level of competitiveness on all parameters.
- To be an ethically responsible organization in all aspects of the business.
- To effectively harness and integrate all available technology across various elements of the textile chain.
- To cater to product innovation by mastering value added areas like processing and finishing.

Corporate

Strategy

To emerge as a leader in terms of market share achieved through quality products. The Company believes in achieving a consistent growth by striking a perfect balance between profitability and social welfare, emphasizing on complete customer satisfaction.

Bannari Amman Spinning Mills Limited is a Listed Company, engaged in spinning, weaving and manufacturing ready to wear garments with its roots in South India. The Company has been tirelessly striving towards newer horizons under the leadership of its **Chairman & Managing Director Sri S.V. Arumugam**, supported by his family and qualified professionals, growing consistently with each passing year.

Message from the Chairman's Desk

Sri. S. V. Arumugam, is the Chairman cum Managing Director and Promoter of our Company. He holds a Bachelors Degree in Science and is a qualified Chartered Accountant. He has more than two and half decades of experience in the textile industry especially in planning, procurement, execution and management. Presently he is the Chairman of Confederation of Indian Textile Industry (CITI), an apex body for textile Industry. He is a Committee Member of the Indian Cotton Mills Federation (ICMF), Mumbai and he is also the Vice Chairman of Indian Wind Power Association, Chennai.

“ Fill the brain with high thoughts, highest ideals, place them day and night before you, and out of that comes great work ”

- Swami Vivekananda

It is with much pride, I look back the path we treaded, during the last two and half decades. I am sure, the solid growth we have achieved bears testimony to:

- the consistent business policies we follow – still flexible enough to adopt to the changing business environments,
- quality consciousness for the products we produce,
- relentless and hard working workforce,
- ethical and conscience driven management , etc.,

When I look forward, the core competencies we have built for ourselves over the period will take us to new heights. I strongly believe we are capable of achieving this without compromising principles and practices we have been known for.

S V ARUMUGAM

Bannari Amman Spinning Mills Limited

The company belongs to **Bannari Amman Group**, one of the largest industrial conglomerates in South India, with a wide spectrum of manufacturing, trading, distribution and service activities. The Company's net-worth is about Rs.250 crores (USD 40 million), with sales turnover crossing Rs.600 crores (USD 100 million).

The Company was incorporated in the year 1989 and issued shares to the public in the year 2005. The shares of the company are Listed in the National Stock Exchange of India and the Stock Exchange of Mumbai.

Bannari Amman Spinning Mills Limited, is a vertically integrated textile company. It is engaged in manufacture of Cotton Yarn, Woven and Knitted fabrics, Garments, Processing and Wind power generation.

The Company has two modern spinning units near Dindigul, Tamilnadu, housed in around 7.85 lakh square feet with installed capacity of about 1.45 Lakh spindles. Weaving Unit near Coimbatore, Tamilnadu, with installed capacity of 146 Looms, Processing unit capable of processing 4 MTs of knitted fabric per day, Garments Unit with a capacity to produce 15,00,000 pieces of garments annually and 32 Windmills with installed capacity of 29.95 MW of Power.

The Spinning unit was set up in the year 1995. Since inception we have evolved to be a leader in cotton yarn spinning in South India, commanding a premium in the market for our products.

Spinning

Bannari Amman Spinning Mills Ltd., commenced its spinning operation at Dindigul with an installed capacity of 30,000 spindles which produces around 16 tons of cotton yarn per day, with product range from ne 20/1 to ne 40/1 combed knitting and weaving yarn. The company had gone for major expansion in spinning during 2007 at Dindigul with an installed capacity of 1,14,000 spindles which produces from ne 20/1 to ne 40/1 combed knitting yarn and ne 40/1 to ne 80/1 compact yarn for weaving.

Out of 57 tons of cotton yarn produced per day from both the mills, around 45 tons of yarn is produced as knitting yarn and our major area of specialisation is production of combed and compact knitting yarn.

Out of total 1,44,000 spindles, 92,000 spindles are equipped with compacting facility which produces high quality of combed weaving compact yarn and also combed knitting compact yarn.

Spinning

Both the mills are equipped with state of art modern spinning machinery from LMW Coimbatore, RIETER Switzerland, SCHLAFHORST OERLIKON Germany and full range of testing equipments from USTER Switzerland. The complete spinning plant is installed with auto control humidification system and waste collection system from blowroom to combing departments. All the spinning frames are monitored by Ring Data System.

Since inception, we have evolved to be a leader in cotton yarn spinning in South India, commanding premium for the products manufactured. Knitting yarn is sold in major consuming centers in India like Tirupur, Kolkata & Kanpur.

Compact weaving yarn is marketed to various customers in Central India and Tamilnadu markets.

Around 40% of the production is exported to China, Bangladesh, Korea, Philippines, Srilanka, Tunisia and European markets.

The company has been awarded **ISO 9001 : 2008 Quality Certificate System** by DNV Netherlands, and **Social Accountability System SA 8000 : 2008** by TUV, **Global Training Method 5s** certified by Quality Circle Forum of India.

The company is also awarded as **Export House** by Government of India for its export performance.

Weaving

It has Sulzer projectile and Airjet wider-width looms, which are the most versatile machines in the weaving field, with the capability to weave across a range of fabric and counts in an economic manner.

Weaving unit is located near Coimbatore, Tamil Nadu, in a working space of 2.2 lakh sq feet. It specializes in manufacturing wider-width fabric upto 140 inches in the 500 TC to 1000 TC (thread count) range.

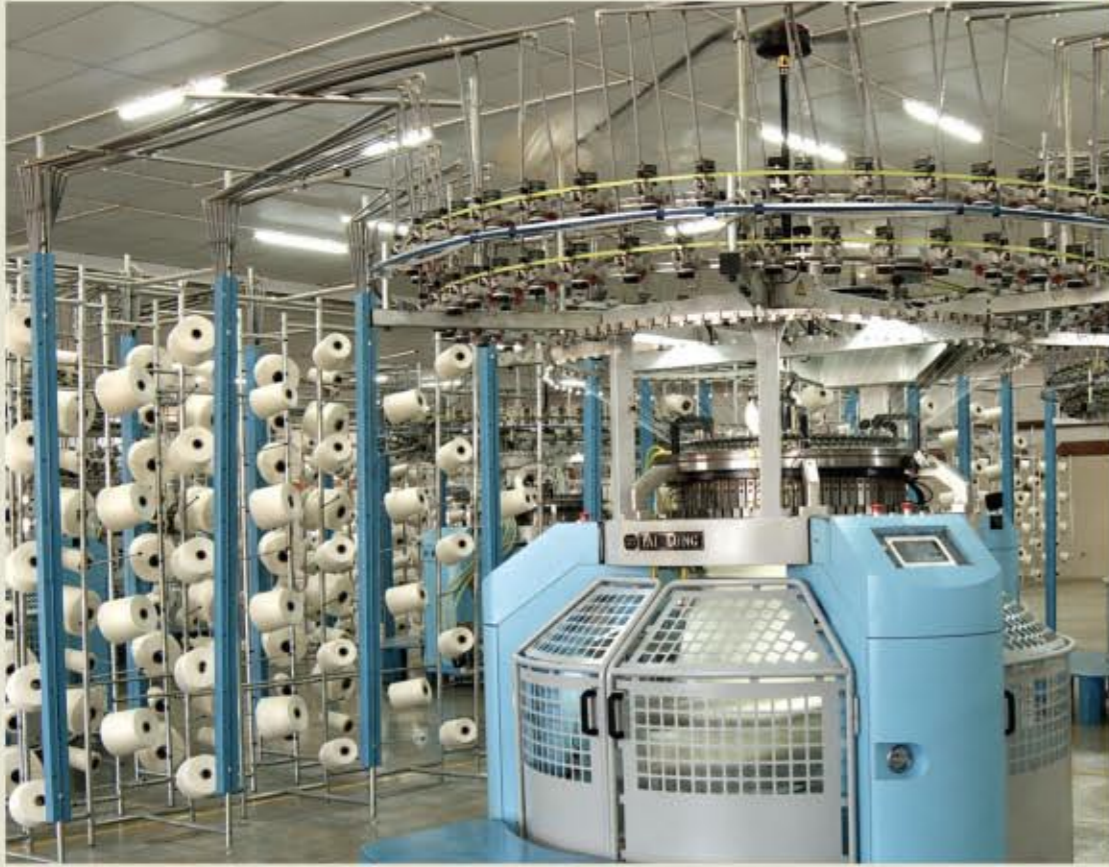

It has Sulzer projectile wider-width looms, which are the most versatile machines in the weaving field, with the capability to weave across a range of fabric in an economic manner. We produce with 2, 4 and 8 pick insertions, with maximum

warp density of 110 ends/cm (280 ends/inch) with warp counts upto 100s Ne.

Currently 18 Dobby looms have been specially modified for ultra fine count weaving which are also in wider-width formats.

We also have 135 Sulzer wider width Jumbo looms and 12 Sulzer Airjet looms, specially, capable of producing ultra fine count fabric in narrow / wider-width.

Knitting Division started in the year 2009 is located in Coimbatore, Tamil Nadu. It produces Grey Single Jersey, Interlock and Rib fabrics in diameter ranging from 20" to 36". The knitting Unit has the capability to produce 3,00,000 meters of Knitted fabric per year.

- 52 Knitting machines of Pailung and Mayer & Cie make.
- 15 tons of grey knitted fabric production.
- All machines with Spandex attachments.
- 100% inspection of fabric rolls under 4 Points Inspection System.
- Flexible Machine Specifications - Dia from 20" to 36" - 24 / 28GG

Knitting

Processing

The Processing Division is located at Perundurai, Tamilnadu, which provides high quality solutions for Textile dyeing, printing and as well as finishing needs. Our production facility contains innovative and reliable systems to match up to all levels of processing requirements. We are well equipped with a range of imported and Indian machinery for dyeing, padding, drying, printing, continuous washing and stentering.

Our unit is equipped with the latest facilities in Effluent Treatment, including RO plant, Nano Filtration, Evaporator and it is fully approved by the Pollution Control Board under current norms. We have a well equipped testing lab for stringent Quality Control.

Our unit is equipped with the latest facilities in Effluent Treatment, including RO plant, Nano Filtration & Evaporator. It is fully approved by the Pollution Control Board under current norms.

Garments

The company has established a Garment Unit near Coimbatore, Tamilnadu to manufacture knitted garments, with capacity to produce 15,00,000 pieces per year under the name FASHION THREADS.

Garment facility is fully equipped with state of the art equipments and robust systems for producing inner and outer wear. With top quality raw materials, modern machinery and efficient production techniques, we manufacture premium quality products at competitive prices.
